### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method of cooling a bottle mold.

Group II, claim(s) 9-22, drawn to a bottle mold apparatus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common special technical feature, the bottle mold apparatus, is known in the art and therefore cannot be a special technical feature under PCT Rule 13.2. Cote (International Patent Application Publication No. WO 01/53224) teaches a bottle mold (see Abstract) comprising inner and outer members (see inner member 2 and outer member 3 in Figure 1) formed by casting (see page 5, lines 31-33, wherein "fonte" is the French word for casting), for forming a contour surface part (see the interface surface between mold cavity 4 and inner member 2 in Figure 1) and an outer peripheral part of the mold (see the radially outermost surface of outer member 1 in Figure 1), and further comprising a cooling path (see cooling path 3 in Figure 1) that includes an abutting path formed between abutting

Art Unit: 1791

surfaces of the inner and out members (see Figure 1, wherein cooling path is formed at the abutment of inner member 2 and outer member 1) by casting (see page 5, lines 31-33), wherein the cooling path has a vent and an exhaust outlet at an outer peripheral surface of the mold (see the upper and lower intersections of cooling path 3 with the exterior surface of outer member 1 in Figure 1).

3. A telephone call was made to Bruce Hamburg on 23 December 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
